This workshop comprises two half-day sessions of instruction and discussion concerning the management of complex and fluid social housing situations for nonhuman primates in a variety of captive settings, including zoos, sanctuaries, and research facilities. This workshop will address aspects of the social management of apes and monkeys. Information will be presented on social housing strategies, management of large social groups and pairs, social reintroduction decision-making, observations of nighttime behavior, addressing constraints to social housing, and social housing from the perspective of a wide variety of stakeholders. This workshop is designed for caregivers, keepers, behavior management personnel, veterinarians, veterinary technicians, curators, supervisors, institutional animal care and use committee members, and research personnel.
